If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

Primary Examiner, Art Unit 2629

1. **Status:** Please all the replies and correspondence should be addressed to Examiner's new art unit 2629. Receipt is acknowledged of papers submitted on 03-25-2009 under amendments and request for reconsideration; which have been placed of record in the file. Claims 1-7, 9-18, and 34-50 are pending and Claims 8 and 19-33 have been cancelled in this action.

Response to Amendment

2. The amendments filed 03-25-2009 do not introduce any new matter into the disclosure. The added material is supported by the original disclosure. Applicant has cancelled claims 8 and 19-33 are cancelled. Applicant has amended claims 1, 11 and 34 to overcome prior art rejection and adding allowable limitations to expedite allowability of the instant application.

3. The office action mailed on 03-10-2009 allowed Claims 41-50. Applicant has amended independent claims 1, 11 and 34 adding allowed limitations to overcome prior art rejection and adding allowable limitations to expedite allowability of the instant application. Applicant's arguments see Remark, filed on 03-25-2009 with respect to Claims 1, 11 and 34 regarding "an image capture device having a diffuser, the diffuser configured to render defocused images by the image capture device so as to produce an expanded region of pixels around a light of the LED, the expanded region of pixels increasing pixel data to identify the light of the LED, the image capture device being placed at a location of the display screen, the image capture device being configured to capture the LED of the input device when directed toward the display screen to enable interaction with illustrated objects as a result of the mode change, the mode change being a result of the LED of the input device changing from one color to another color, and the

mode change being discontinued when the changing in light reverts back to an original color or another color, as triggered by the mode change activator of the input device” have been fully considered, extensively searched in prior art as well as PUPUB and are persuasive as they do overcome prior art rejection and newly cited prior arts; which puts application number 10759782 in condition for allowance.

Allowable Subject Matter

4. Claims 1-7, 9-18 and 34-50 are allowed.
5. The following is an examiner’s statement of reasons for allowance:
6. The office action mailed on 03-10-2009 allowed Claims 41-50. Applicant has amended independent claims 1, 11 and 34 adding allowed limitations to overcome prior art rejection and adding allowable limitations to expedite allowability of the instant application. Applicant’s arguments on 03-25-2009 are convincing. As argued by applicant in remarks under claim rejection; page 8, paragraph 2, the prior art of Girod (US 6,677,987 B1) in view of Levine; Bruce M et al. (US 6709108 B2) and further in view of Curran et al. (US 6,753,849 B1) and Pryor (US 2006/ 0033713 A1); all of the prior art cited on 892’s 1449’s, searched in NPL and searched in PGPUB fails to recite or disclose the uniquely distinct features of the independent claims limitations below in combination with all the other limitations of independent claims recited:

an image capture device having a diffuser, the diffuser configured to render defocused images by the image capture device so as to produce an expanded region of pixels around a light of the LED, the expanded region of pixels increasing pixel data to identify the light of the LED, the image capture device being placed at a location of the

display screen, the image capture device being configured to capture the LED of the input device when directed toward the display screen to enable interaction with illustrated objects as a result of the mode change, the mode change being a result of the LED of the input device changing from one color to another color, and the mode change being discontinued when the changing in light reverts back to an original color or another color, as triggered by the mode change activator of the input device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
